

## SIDE ELEMENTS (CAMARGUE®, ALGARVE®, SKYE®, LAGUNE® AND TOSCANE®)

### Endless customisation options

**Camargue, Lagune** and **Toscane** can have various elements (such as sun protection fabric, sliding panels, glass walls, etc.) fitted to the front and/or sides. This results in endless customisation options.

The front and/or the sides of the **Algarve** can be fitted with vertical sun protection.

**Lowered windproof, motorised Fixscreens** create a protective cocoon. Thanks to the partial transparency of the screens and the use of Crystal windows, you don't lose the

view of the garden. You've also got a wide range of colours to choose from. Every colour combination is possible and can perfectly be combined with other materials, such as the garden furniture. In the open position, the **integration of the screens is invisible** and the motors are also completely concealed in the structure.

You can also opt for **sliding glass walls**. When combined with windproof screens, you also retain the benefit of sun protection.

Elegant **Loggia sliding panels with windproof screen fabrics or [adjustable or fixed] wooden or aluminium blades** are also an option. Wood [particularly cedar] has made a comeback and is easy to combine with other materials.

You can even opt for a two-toned colour finish when you combine sliding panels with aluminium blades.

## OUTDOOR CURTAINS (CAMARGUE®, ALGARVE® AND SKYE®)

### Fitted with curtains for outdoor use

**Camargue, Algarve** and **Skye** can be fitted with outdoor curtains. This allows you to create a fairy-tale atmosphere under your covering.

These polyester curtains for outdoor use are water-resistant, mould-resistant and repel dirt.

Moreover, they have a constant weather-resistance and colourfastness, even after washing. This will not wrinkle.

The curtains are delivered completely made to order.

Moreover, they can be combined in the Skye and Camargue with sliding glass walls and integrated Fixscreens

The outdoor curtains can always be combined with Updown LED lighting. This gives the terrace covering a romantic feel at twilight.

## SLIDING GLASS WALLS (CAMARGUE®, SKYE®, LAGUNE® AND TOSCANE®)

Increased elegance thanks to completely transparent sliding walls.

You can also choose to install sliding glass walls. Completely transparent sliding walls increase the elegance of the **Camargue, Skye, Lagune** and **Toscane**. This also protects you from the weather and wind, and the terrace covering can be completely enclosed to prevent theft.

You can of course always integrate the vertical, windproof Fixscreen sun protection together with a sliding glass wall, which keeps the major advantage of sun protection.

Plus, you can combine the glass wall with the outdoor curtains, even when already combined with the integrated Fixscreens.

### Integration

**Camargue** and **Skye**:  
available in Span and/or Pivot  
**Lagune** and **Toscane**:  
available in Side and/or Front

Better protection from the wind  
and rain thanks to glass panels that  
perfectly maintain your view.

The Camargue is fitted with sliding glass walls and integrated Fixscreens in the Span and Pivot side

The Lagune is fitted with sliding glass walls in the Side and Front

The Lagune is fitted with sliding glass walls and integrated Fixscreen in the Side and Front

## LOGGIA SLIDING PANELS® (CAMARGUE®, SKYE®, LAGUNE® AND TOSCANE®)

You control the amount of light that comes in

With the vertical sun protection sliding panels, we can even influence the way sunlight penetrates under your terrace

covering [dynamic sun protection]. Sun protection sliding panels are made of aluminium frames with:

### Privacy

Manually adjustable wooden or aluminium blades. The **Privacy** model of the Loggiawood and Loggialu sliding panels have blades that can be rotated manually from fully closed or open [applicable for **Camargue**].

*Camargue fitted with Loggiawood sliding panels on the Span side*

*Lagune fitted with Loggiawood sliding panels on the Span side*

*Natural oak*

*Walnut*

ACCESSORIES

## LINIUS WALL (CAMARGUE®, ALGARVE® AND SKYE®)

### Physical barrier or decorative finish for the underlying wall

The Linius bladed wall, in the Algarve, Camargue or Skye, lets you create a physical barrier and decorative finish.

The Linius fixed wall is available as a single or a double-sided, cladded wall across the entire passage height, or can be finished at a customised height with a top profile to create a railing. Perfect as a border for terraces or balconies in the hotels, restaurant and catering sector.

The support structure ensures an invisible connection between the finishing blades, which creates an unbroken line along the entire passage width.

The wall fits neatly into the space in the columns on both the front and back sides. Differences of height in the floor of up to 6 cm are corrected by the finishing skirting-board, so that there are no disruptive gaps visible at the bottom.

The Linius wall is custom finished in the colour of the covering or of your choosing. Moreover, the double-sided wall allows for the application of sound proofing. This way you can enjoy the nature around your covering in utter relaxation.

*Linius fixed wall, bar height, double-sided*

*Linius fixed wall, full height, single or double-sided*

ACCESSORIES

## LOGGIA® EASY PASSAGE / SLIDING DOOR (NOT WITH TOSCANE®)

Perfect for when the terrace covering is completely enclosed (using Fixscreen, for instance) and you want to have easy passage from in or out of the terrace covering without having to open the Fixscreen (the comfort of those sitting under the terrace covering is maintained).

### Types

- Loggia-wood: wooden blades (Western Red Cedar)

- Loggialu: aluminium blades
- Loggiascreen Canvas: fabric screen (fibreglass)
