

INTEGRATED FIXSCREEN® (CAMARGUE®, SKYE®, LAGUNE® AND TOSCANE® FRONT)

Perfect integration, even afterwards!

Perfect for:

- Privacy
- Shade when the sun is low in the sky
- Protection from wind, rain and insects

Thanks to an ingenious zipper system, the fabric is windproof in every position and is insect-proof when closed. It is an incredibly well-thought-out principle in which the sun protection fabric has a special zippered trim. This ensures that the entire structure is held firmly by the two side guides.

By integrating this Fixscreen, with or without Crystal windows to keep a view of the outside, you can create an extra outdoor room where the users are protected from sun, rain and

wind. These screens come in 50 colours and allow you to customise the **Camargue**, **Skye**, **Lagune** and **Toscane** and create the atmosphere you desire.

The frame profiles are developed in such a way that the bottom bar is aesthetically hidden away in the box when the screen is raised.

Connect&Go technology

The integrated Fixscreen is fitted with our patented Connect&Go technology. This new development provides an enormous advantage for installation, as well as for removing the fabric roller tube when replacing a screen or motor.

Bottom bar disappears into the Camargue box

FIXSCREEN BASE® (ALGARVE®, TOSCANE® SIDE, AND LAPURE®)

Enclosing the sides

To close off the sides of the **Algarve**, **Toscane** or **Lapure**, these can be combined with the Fixscreen 100^{EV0} Slim F or the Fixscreen 150^{EV0} F. This allows for the box for the sun protection screen to be mounted underneath the frame profiles so that this connects perfectly with the basic construction.

FIXSCREEN® FIBREGLASS FABRIC SCREENS **(CAMARGUE®, ALGARVE®, SKYE®, LAGUNE®, TOSCANE® AND LAPURE®)**

Transparent sun protection fabric

The best choice in transparent sun protection fabric for windproof vertical sun protection is fibreglass fabric. Fibreglass fabrics score the highest in terms of tension and rigidity, and are also highly resistant to moisture and heat, all while maintaining the view.

We offer a wide range of colours so that you can find the fabric that suits you perfectly.

The “Architects’ Selection” is a range of colours that are very popular in the current design and architecture trends.

Our Renson® Ambassadors will be happy to assist you in making your choice.

The fibreglass fabrics are also available with a Crystal window, providing a crystal-clear view.

CRYSTAL WINDOWS

Optimum contact with the outdoor space

In order to maintain the highest level of contact with the space outside the covering, transparent Crystal Windows in integrated Fixscreen fibreglass fabric can be installed. This transparent type of fabric is made from PVC (Fire classification M2). The Crystal fabric is welded into a fibreglass screen using high-frequency welding. This fabric can be used in the integrated Fixscreen, Fixscreen 100^{EVO} Slim F and the Fixscreen 150^{EVO} F.

There are various options where you can choose between three types of windows:

- One window of 1,200 mm by min. 1,200 mm
- 2 windows* next to each other
- 2 windows* one above the other

A total of two Crystal windows can be installed per screen. There must be a minimum distance of 200 mm between the sides of the fabric and between the Crystal windows themselves. There must be a distance of 400 mm between the Crystal windows and the bottom and the top edges of the fabric.

* Either the height or the width must be 1,200 mm. The other dimensions must be at least 1,200 mm.
