Pergola awning P40

Enjoy living out
and feeling in!

Do you expect your sun shading system to provide more than just a cosy shaded area and also place the highest value on attractive design?

Then discover the high-grade pergola awnings from WAREMA. They impress with their harmonious styling and thus add unique highlights to any patio. At the same time, the stable construction ensures optimum sun and weather protection at all times – even in stormy weather. The range of designs, colours and frame colours, in addition to the numerous extras, guarantees a maximum level of design freedom and operating comfort.

Extend your "summertime" by a good few days with our pergola awnings and treat yourself to some added home-feeling quality!

Design meets function:
pergola awnings with impact

You are sitting comfortably on your patio and a rain shower approaches? With our pergola awnings you can sit back and relax. Because they don't only provide reliable sun protection, they also protect you from the rain. If requested, a lowerable pole can ensure safe water drainage, for example. When it comes to the design, the pergola awning will bring a breath of fresh air with its curved guide rail and is guaranteed to be a real eye-catcher on your house.

► **Valance roller blind**

The valance roller blind, which is very easy to operate using a crank, provides reliable visual privacy and glare control.

► **secudrive®**

The tight guidance of the curtain ensures optimal stability in windy conditions and prevents an unwanted light gap at the side.

Open air with style:
pergola awnings with a clear line

Want something exceptional?

Combine the first-class sun shading and weather protection with outstanding design. Transform your outdoor space into an oasis of well-being with pergola awnings. With their elegant shape, they create large areas of shade and will be an eye-catcher on your patio. Look forward to your new "open space" with style.

► **WMS –
WAREMA Mobile System**

The intelligent WMS control allows you to control awnings and light easily and according to your own preferences using a hand-held transmitter.

A beautiful glow:
Integrated LED lighting

Are you looking forward to a mild summer evening on your patio?

With our pergola awnings, you can create the perfect atmosphere. The dimmable LED lighting, which is barely visible integrated into the guide rails, gives a pleasantly warm light and therefore provides a cosy environment to live out, feel in. So you can round off your day in a relaxed atmosphere. A real highlight!

► **Radiant heaters**

The optional radiant heater guarantees pleasant temperatures under the awning even in colder weather or in the evening hours.
